Plastic hand-held housing TKC with battery compartment and protective cover

- For 8 different battery types
- Plastic hand-held housing in 9 different sizes
- Protective cover made of silicone in numerous colours
- Numerous colour combinations possible

The hand-held housings of the TKC series are characterized in particular by the differently coloured elastic silicone protective covers. The protective covers provide a non-slip support as well as protection against shocks. The combination of the housing sizes, housing colours, colours of the protective covers and the selection of battery compartments results in a very large variety of variants. The plastic housings are for example suitable for use as a measuring instrument, test instrument, for data transmission, in medical technology etc.
